Farligt

A product of decomposed plant material, tannin occurs in natural waters and is used for boiler and cooling tower water treatment, dyeing, ink manufacture, tanning, and paper sizing. Lignin, also a plant product, is found in paper pulp manufacturing waste. Tannin and lignin are analyzed together and reported as mg/L tannic acid. This kit utilizes the simple, low-cost color disc method - the most accurate visual test kit method.

Tannin and lignin are analyzed together and reported as mg/L tannic acid.
