

Polymetron 8411 B1 12 mm pH combination electrode, refillable, S7 connector

Produktnr:	368411,10000
SEK Pris:	Kontakta oss
Skickas inom 1 vecka	

Combination electrode with refillable reference with plastic connector to put electrolyte under pressure. Liquid junction as a annular ceramic ring. Suitable for high-pressure processes.

Specifikationer

Diameter:	12 mm
Impedans:	50 - 250 MΩ
Kabelanslutning :	S7 connector
Längd:	120 mm
Material:	Sensor: Spherical glass
Mätområde:	0 - 14 pH
Membran:	Annular ceramic ring
Omgivningstemperatur:	0 - 90 °C
Specialkommentarer:	Refillable reference with plastic connector to put electrolyte under pressure
